Mateusz Witaliński

JavaScript Developer, Team Leader

PROFILE

I am a software developer for over ten years now. My skills evolve along with the internet evolution and my great experience is growing constantly.

I have started when the Internet was making its first steps. Since then I had an opportunity to learn new technologies, be in various roles, work with new methodologies and check several different approaches. I was working with customers and developers from all around the world.

EXPERIENCE

LEOCODE — JavaScript Developer, Team Leader & Project Manager

JUNE 2011 - PRESENT

I works on Frontend, usually with Angular, but also with pure JS/TS, React/React Native, Meteor/Express/Nest or other Node backend stack. Considered a Frontend Architect with a large expertise. Delivers a UI design as well.

Over time my competencies were expanded to include the Team Leader and the Project Manager for several projects. Demonstrates a great sense of responsibility, so can be entrusted with the biggest challenges.

Applifactory — Self employed

OCTOBER 2009 - MAY 2011

Building various web and mobile solutions for several companies, from the small units to the biggest Polish corporations. It was the time of exploring new technologies and gaining new competences.

Quickfoto.pl — Project manager, PHP and Adobe Flex Developer

JANUARY 2008 - NOVEMBER 2009

Building my own idea and vision — an advanced Photo Printing system with some extra features such as visual photo editor, calendar and photo gadget (mugs, pillows, etc.) creator.

The only technology that could deliver such a sophisticated user interface and client-side image processing those days was the Flex framework. All was wrapped up with the PHP backend.
